## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Mainord.

The reference discloses emulsifiable polyolefin waxes prepared by reacting polyolefin with diesters of maleic acid (see col. 1, lines 40-45), for example, homopolymers and copolymers containing propylene, ethylene-propylene copolymer (see col. 2, line 8) with maleate components (see col. 3, lines 4-6), for floor polishes (see col. 1, lines 18-19), having a melt viscosity range from about 25-500 cps (see col. 2, line 27) and an emulsion light transmittance of 81 %.

The disclosure of the reference differs from the instant claims in that it does not disclose the claimed Mw of about 10,000 to about 20,000.

However, the composition disclosed by the reference is prepared from reactants and under process conditions that are inclusive of the claimed reactants and conditions.

Art Unit: 1711

In view of this similarity, it would appear to be inherent that a product, an emulsible polyolefin wax, having the claimed Mw could be prepared following the teachings of the reference. See *In re Best*, 195 USPQ 430, 433 (CCPA 1977).
